SKILLS

Frontend

React · Next.js · TypeScript · JavaScript ·
Tailwind CSS · RTL/Arabic UI

Backend

Node.js · Express · Prisma · PostgreSQL ·
MongoDB · Redis · JWT · Stripe

Tools & DevOps

Git/GitHub · Docker · Vercel · Render · VPS · k6
· DNS management

Data & Other

Python · scikit-learn · Lua/FiveM scripting

Security (learning)

Kali Linux · TryHackMe · HackTheBox

LANGUAGES

Arabic — Native

English — Professional working proficiency

EDUCATION

B.Sc. Software Engineering

Ajloun National University (ANU), Jordan

NovaX Engineering Competition

Al-Yarmouk University — team event-
management app

CERTIFICATIONS

Using Python to Interact with the OS —
Coursera

Crash Course on Python — Google

Automation & AI Agents — University of
Oxford

CS50 — Harvard University

Data Analysis with Python — Cisco

+ several additional certifications

PROFILE

Full-Stack Web Developer and Software Engineering student with hands-on experience shipping production web platforms (Next.js/React front ends, Node.js/Express APIs, PostgreSQL) and freelance delivery for clients across the MENA region. Comfortable owning a project end-to-end — architecture, deployment, and post-launch iteration — with a growing interest in cybersecurity.

EXPERIENCE

Freelance Full-Stack Developer — Independent

2022 — Present

- Delivered 40+ projects for clients across the MENA region: SaaS dashboards, e-commerce platforms, custom APIs, and game-server infrastructure.
- Maintained consistent 5-star client satisfaction through clear communication and reliable delivery.

FiveM Developer & Server Manager — Various RP Communities

2021 — 2023

- Built custom gameplay systems (economy, housing, jobs) and anti-cheat solutions for Arabic roleplay servers, using Lua and OxLib.
- Focused on low-resource optimization to keep server performance stable under load.

SELECTED PROJECTS

IEEE ANU Platform — [ieeeanu.app](#) · Next.js, Express, PostgreSQL, Vercel/Render

- Official platform for the IEEE ANU student branch: e-commerce store for educational materials, training workshops, and membership services.
- Implemented bulk email delivery, password-reset flow, rate limiting, AI integration (Together AI), and load testing with k6.

Justice City Framework — [justicecfw.com](#) · Lua, React, JavaScript

- Comprehensive FiveM server framework with player statistics, content-creator showcases, live-stream integration, and a custom job/progression system.

TRY JO — Arabic E-commerce Store · React, JavaScript, Arabic RTL

- Full Arabic RTL storefront with product browsing, search, category filtering, and a shopping cart with offers/discounts.

ATP Security & User Management Dashboards · HTML, CSS, JavaScript, Arabic RTL

- Real-time system-monitoring dashboard (CPU/RAM/network/traffic) and a full user-management console (roles, permissions, activity logs), both with Arabic RTL interfaces.

Arabic Text Classification System · Python, scikit-learn

- NLP classifier sorting Arabic text into four categories (thanks, complaint, inquiry, suggestion) for integration with [ieeeanu.app](#).
